

Social-Emotional Skills Matrix

Second Step Program and Social-Emotional Skills Matrix

SEL in the Australian Curriculum

The Social and Emotional competencies taught in the Second Step program align with the Personal and Social Capabilities within the General Capabilities criteria of the Australian Curriculum. General Capabilities play a significant role in the Australian Curriculum in equipping young Australians to live and work successfully in the twenty-first century.

In the Australian Curriculum, capability encompasses knowledge, skills, behaviours and dispositions. Students develop capability when they apply knowledge and skills confidently, effectively and appropriately in complex and changing circumstances, in their learning at school and in their lives outside school. Personal and Social Capabilities as outlined in the Australian Curriculum

Self-awareness

This element involves students developing an awareness of their own emotional states, needs and perspectives. Students identify and describe the factors that influence their emotional responses. They develop a realistic sense of their personal abilities, qualities and strengths through knowing what they are feeling in the moment, and having a realistic assessment of their own abilities and a well-grounded sense of self-knowledge and self-confidence. Students reflect on and evaluate their learning, identify personal characteristics that contribute to or limit their effectiveness and learn from successes or failures. In developing and acting with personal and social capability, students:

- recognise emotions
- recognise personal qualities and achievements
- understand themselves as learners
- develop reflective practice.

Self-management

This element involves students developing the metacognitive skill of learning when and how to use particular strategies to manage themselves in a range of situations. Students effectively regulate, manage and monitor their own emotional responses, and persist in completing tasks and overcoming obstacles. They develop organisational skills and identify the resources needed to achieve goals. Students develop the skills to work independently and to show initiative, learn to be conscientious, delay gratification and persevere in the face of setbacks and frustrations. In developing and acting with personal and social capability, students:

- express emotions appropriately
- develop self-discipline and set goals
- work independently and show initiative
- become confident, resilient and adaptable.

Social Awareness

This element involves students recognising others' feelings and knowing how and when to assist others. Students learn to show respect for and understand others' perspectives, emotional states and needs. They learn to participate in positive, safe and respectful relationships, defining and accepting individual and group roles and responsibilities. Students gain an understanding of the role of advocacy in contemporary society and build their capacity to critique societal constructs and forms of discrimination, such as racism and sexism. In developing and acting with personal and social capability, students:

- appreciate diverse perspectives
- contribute to civil society
- understand relationships.

Social Management

This element involves students interacting effectively and respectfully with a range of adults and peers. Students learn to negotiate and communicate effectively with others; work in teams, positively contribute to groups and collaboratively make decisions; resolve conflict and reach positive outcomes. They develop the ability to initiate and manage successful personal relationships, and participate in a range of social and communal activities. Social management involves building skills associated with leadership, such as mentoring and role modelling. In developing and acting with personal and social capability, students:

- communicate effectively
- work collaboratively
- make decisions
- negotiate and resolve conflict
- develop leadership skills.
